DETAILED ACTION

1. Applicant's filing RCE dated Nov. 6, 2009, responds to the office action mailed Aug 6, 2009 provided in the rejection of claims 1-22.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert C. Kowert (Reg. No. 39,255) on 1/11/2010 to place the claims in the condition for allowance.

3. The application has been amended as following:

In the claimed list filed on 11/16/2009, please amend claim 12 as follows:

A system for patching applications, comprising:

- a first computer comprising one or more processors configured during operation for
running a first type of operating system;
- a first application executable on the first computer,
wherein the first application comprises one or more old code components; and
- a patch package comprising a patching mechanism and a first set of one or more new
code components,
wherein the patching mechanism is executable on the first computer running the
first type of operating system to install the first set of one or more new

code components to replace the one or more old code components with the first set of one or more new code components, and wherein the patching mechanism is also executable on a second computer running a second type of operating system to install one or more new code components;
wherein the patching mechanism and the first set of one or more new code components are deployed together on the first computer as part of the same patch package.

Allowable Subject Matter

4. Claims 1-22 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to suggest

“A method for patching applications, comprising: deploying a patch package on a first computer running a first type of operating system, wherein the patch package comprises a patching mechanism and a first set of one or more new code components, and wherein the patching mechanism is executable on the first computer running the first type of operating system to install the first set of one or more new code components and is also executable on a second computer running a second type of operating system to install one or more new code components; wherein the patching mechanism and the first set of one or more new code components are deployed together on the first computer as part of the same patch package; and executing the patching mechanism on the first computer, wherein executing the patching mechanism comprises the patching mechanism performing a replacement of a first set of one or more old code components in a first application with the first set of one or more new code components.”, as recited in independent claim 1 and similarly recited in independent claim 12. Claims 2-11 and 13-22 are considered allowable by virtue of their dependence on allowable independent claims 1 and 12 respectively.

Art Unit: 2191
